### DIAGNOSTICS

|   | Largest Contentful Paint element – 3,360 ms                                     | $\sim$ |
|---|---|--------|
|   | Eliminate render-blocking resources – Potential savings of 250 ms               | ~      |
|   | Page prevented back/forward cache restoration — 7 failure reasons               | ~      |
|   | Serve static assets with an efficient cache policy – 2 resources found          | ~      |
|   | Avoid serving legacy JavaScript to modern browsers — Potential savings of 8 KiB | ~      |
|   | Reduce unused JavaScript – Potential savings of 525 KiB                         | ~      |
| 0 | JavaScript execution time – 0.8 s   | ~      |
| 0 | Minimizes main-thread work – 1.3 s  | ~      |
| 0 | Avoid long main-thread tasks — 6 long tasks found                               | ~      |
| 0 | Avoid large layout shifts — 4 layout shifts found                               | ~      |
| 0 | Initial server response time was short – Root document took 40 ms               | ~      |
| 0 | Avoids enormous network payloads – Total size was 1,209 KiB                     | ~      |
| 0 | Avoids an excessive DOM size – 263 elements                                     | ~      |
| 0 | Avoid chaining critical requests – 1 chain found                                | ~      |
| 0 | Minimize third-party usage — Third-party code blocked the main thread for 0 ms  | ~      |

# Accessibility

These checks highlight opportunities to <u>improve the accessibility of your</u> <u>web app</u>. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so <u>manual testing</u> is also encouraged.

#### ARIA

ARIA progressbar elements do not have accessible names.

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

## CONTRAST

Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

#### TABLES AND LISTS

Lists do not contain only elements and script supporting elements (<script> and <template>).

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

#### NAVIGATION

Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

#### ADDITIONAL ITEMS TO MANUALLY CHECK (10)
